## Experience

---

2024 - Current: Frontend developer for the City of San Francisco

### Earthquake Soft-Story Awareness Web Application

I contribute to building responsive user interfaces for a web app that enhances earthquake preparedness in San Francisco. Utilizing **Next.js**, **TypeScript**, and **Chakra UI**, I create a user-friendly experience that encourages people to be better prepared. Through **Jest** testing, I ensure reliable application performance, reinforcing the project's goal of strengthening community safety.

2023 - Current: Frontend Developer

### Local Transport Company Web Application: <https://iujex.com/>

As part of a development team, I implemented responsive user interfaces for a multi-role web portal using **React.js**, **TypeScript**, and **Material UI** to enhance the user experience for customers and business owners. Now, I provide ongoing support to ensure the app continues to optimize business processes for cargo, drivers, and vehicle management.

2020 - 2023: Self-employed Frontend Developer

Planner Web Application: Worked with a senior developer to build **React** components using **Bootstrap** and integrated them with backend functionality.

Online Budgeting Tool: Designed and developed a responsive interface using **React** and **Material UI**, implementing reusable components and API calls.

Car Dealership Website: Developed the site using **React** and **Redux**, working closely with designers, developers, and QA engineers.

Online Mortgage Calculator: Built a calculator in **React** from a provided design, working with a manager and QA engineer.

Ice-cream Parlor Website: Created a mobile-first website with semantic **HTML** and **CSS** preprocessors, optimizing for **SEO** and accessibility.

Online Booking Tool: Developed a booking SPA with **React** and **Redux**, using **Jest** for unit testing to ensure proper functionality.

2012 - 2022: IT Consultant and Lead for Front- and Back-end Teams at Accenture

Worked as a member of frontend and back-end development teams in IT Consultant role, where I led a team of developers to execute projects efficiently. Conducted systems assessment, prepared documentation, composed requirements, negotiated design, and tested the resulting applications. Through effective leadership and clear communication, I ensured alignment between development goals and client expectations.

## Objective

---

Frontend developer with vast corporate experience as an IT consultant and a strong background in React and TypeScript development, seeking opportunities to apply skills and creativity to create impactful web experiences

## Skills

---

JavaScript, Typescript, Python
